

Logitech Rally AI Cameras

Smarter conference cameras for modular systems

Rally AI Camera and Rally AI Camera pro bring new intelligence and integrability, which can help channel partners address a wide range of customer environments, from simple meeting rooms to complex, enterprise-grade collaboration spaces.

You can use these cameras to upgrade Rally Plus Systems, deploy as standalone solutions with Logitech or pro audio solutions for a sleek setup, or deploy as a companion camera to Rally video bars especially to focus on presenters.

This Rally Camera positioning guide helps you quickly identify the right AI camera solution based on your customer needs, room complexity, and installation requirements.

Intelligent, engaging experiences

1

- **Optimized** for meetings requiring multiple angles and dynamic participation.
- **Enhances** visibility, engagement, and overall meeting quality.
- **Presenter-focused** tracking keeps remote participants engaged (Pro only).

Simple upgrade path

2

- **Enhance** existing Rally deployments without a full rip-and-replace project.
- **Fast** cabling & swap-outs with minimal disruption.
- **Adds value** for customers upgrading their current setup.

Flexible, seamless deployments

3

- **Fits** standard rooms or complex, DSP-enabled environments.
- **Modular design** enables adaptability depending on room use cases.
- **Design and customize** a high-value experience that best fits the room environment.

Perfect for modular & high-value spaces

Executive boardrooms and large spaces: Keep a clean and professional aesthetic with technology mounted to ceilings and walls, or even hidden away.

Training and multi-purpose spaces: Focus and capture action from multiple vantage points or as room layouts change.

All-hands and events spaces: Capture speakers and audience members from afar and with professional DSP-based audio systems or Rally system audio.
